G.E.C. JOURNAL

OF SCIENCE AND TECHNOLOGY

VOLUME 33, 1966

Published by: **THE GENERAL ELECTRIC COMPANY LIMITED OF ENGLAND**
Head Office: P.O. Box No. 120, 1 Stanhope Gate, London, W.1
Correspondence to: The Editor, Hirst Research Centre, Wembley, Middlesex

INDEX

volume 33, 1966

Inclusive page numbers for the year's issues are:

No. 1 (February) ..... 1 to 48
No. 2 (June) ..... 49 to 96
No. 3 (October) .....97 to 140

PAGE

A

Advanced digital computers for on-line applications 36
Analysis—Lift-traffic recordings and: Mark IV control compared with programme systems 69
Applications of varactor-diode techniques — Varactor harmonic generators 84
Automatic calibration of single-sideband receivers 37
Automatic sorting of tinplate: classification by static switching 105

C

Calibration—Automatic, of single-sideband receivers 37
Centralized digital process control 68
Circuit-breakers — Sulphur hexafluoride: first British-built units commissioned 78
Cold welding of ductile metals: progress in techniques 133
Computers—Advanced digital, for on-line applications 36
Computers, digital, progress on the use of—Power-system analysis 28
Clutches—Electrostatic, based on the Johnsen-Rahbek effect 2

D

Delay line—The magnetostrictive 98
Demountable electrolytic hygrometer 110
Design parameters and noise characteristics—Varactor harmonic generators 17
Design—Test-system 9
Diffusivity—Rapid measurement of thermal, at 500-3000°C 16

PAGE

Digital—Centralized, process control 68
Digital computers—Advanced, for on-line applications 36
Digital computers, progress on the use of—Power-system analysis 28
Digital sequences—Periodic, with pseudonoise properties 115

E

Electron spin resonance: a basic research tool 50
Electrostatic clutches based on the Johnsen-Rahbek effect 2

H

High-Pressure sodium-vapour lamps —Street Lighting with 66
Hygrometer—A demountable electrolytic 110

J

Johnsen-Rahbek effect — Electrostatic clutches based on the 2

L

Lamps — Precision incandescent secondary standard 127
Lifts—Telecommunications and, in the new G.P.O. tower 35
Lift-traffic recordings and analysis: Mark IV control compared with programme systems 69

M

Magnetostrictive delay line—The 98
Measurement—Rapid, of thermal diffusivity at 500-3000°C 16
Metals—Cold welding of ductile: progress in techniques 133

PAGE

N

Network stabilization—Static: recent progress in reactive power control 58
Networks, cascaded—Noise figure and power gain: analysis of their relationship in 111
Networks—Optimum elimination of sneak-paths in 80
Noise characteristics, design parameters and—Varactor harmonic generators 17
Noise figure and power gain: analysis of their relationships in cascaded networks 111

O

On-line applications — Advanced digital computers for 36
Optimum elimination of sneak-paths in networks 80

P

Periodic digital sequences with pseudo-noise properties 115
Power gain—Noise figure and: analysis of their relationship in cascaded networks 111
Power-system analysis: progress on the use of digital computers 28
Precision incandescent secondary standard lamps 127
Process control—Centralized digital 68

R

Rapid measurement of thermal diffusivity at 500-3000°C 16
Reactive power control, recent progress in—Static network stabilization 58
Receivers, single-sideband—Automatic calibration of 37
Recordings and analysis—Lift-traffic: Mark IV control compared with programme systems 69

PAGE

S

Secondary standard lamps—Precision incandescent 127
Sequences—Periodic digital, with pseudonoise properties 115
Sneak-paths—Optimum elimination of, in networks 80
Spin resonance—Electron: a basic research tool 50
Static network stabilization: recent progress in reactive power control 58
Static switching, classification by—Automatic sorting of tinplate 105
Street lighting with high-pressure sodium-vapour lamps 66
Sulphur hexafluoride circuit-breakers: first British-built units commissioned 78
Synopses 48, 96, 140

T

Technical literature 47, 94, 137
Telecommunications and lifts in the new G.P.O. tower 35
Test-system design 9
Thermal diffusivity—Rapid measurement of, at 500-3000°C 16
Tinplate—Automatic sorting of: classification by static switching 105

V

Varactor harmonic generators: applications of varactor-diode techniques 84
Varactor harmonic generators: design parameters and noise characteristics 17

W

Welding—Cold, of ductile metals: progress in techniques 133
